

Seed Bingo

Grade Level: Preschool

Season: Winter

Larger IGS Unit: Seeds

Essential Question

What are seeds? What do seeds grow into?

Objective

Evaluate seed identification and knowledge with this game.

Materials

Four Seed Bingo boards with name of plant and picture (e.g., bean plant for bean, pumpkin, sunflower, etc)

Bingo chips

Seeds that correspond to Bingo board

Jar to hold seeds

Intro

What do we notice on the Bingo board? Have students identify each of the pictures. Where they don't recognize the picture, practice sounding out the word for the seed.

Look through seeds and practice identifying them with the students.

Activity

Find out if anyone has played bingo before. Explain that we will be matching seeds we pick out of the jar to a square on the bingo board. When a sunflower seeds is pulled out, you mark the sunflower square on your bingo board with a bingo chip. When you get three chips in a row you win!

The first student picks a seeds, identifies it and then everyone finds it on their board and places the chip. Keep going in the circle to have students pick seeds out.

Wrap up/Assessment

Play a second game and offer less assistance to students in identifying the seed.
