SNAP PEAS – SUGAR ANN

Peas thrive in cool weather. Snap peas are like springtime candy. Sugar Ann is an early dwarf variety. Sweet 3 inch pods grow abundantly. Bushy plants grow better with a trellis or some support. The vines will climb to 2 feet tall. When it is time to harvest, pods stay crisp and sweet for one week on the vine. There are about 7 peas per pod.

Days to Germinate: 7 to 14

Days to Harvest: 55

Soil Temperature: 45 – 70 degrees F
